Forecast for Wednesday 16 Mar 2022

Weather: Rain/snow and hill fog clearing the Trossachs and southeast through the early hours. Some lingering hill fog through the morning, otherwise a bright day with occasional showers, falling as snow above 500-700 m, mainly in the northwestern Nevis Ranges. Patchy hill fog in the north through the evening.

Chance of cloud-free hill tops above 800m: 10% or less in the Trossachs and southeast through the early hours due to rain/snow and widespread hill fog. Improving to 50% in the northwest and elsewhere through the morning due to occasional hill fog. Improving 75% by midday.

Low Cloud and visibility: Moderate visibility in rain, lowering poor in hill snow and very poor in occasional hill fog, with cloud bases 400-600 m. Otherwise excellent visibility lowering moderate or poor in snow showers.

Met Office Aberdeen Meteorologist's View
Nothing to add.

Forecast for Thursday 17 Mar 2022
Weather: Mainly dry through the early hours with isolated hill fog in the north. Then a band of moderate or heavy rain, or hill snow above 600-800 m moves quickly east through the morning, with scattered blustery showers following in behind through the afternoon, falling as snow above 300-500 m. Strengthening southerly winds into Thursday morning, with gales or severe gales on exposed summits and ridges, becoming westerly by the afternoon.

Maximum wind: Southerly becoming westerly mean 35-40 mph gusting 50-60 mph through the morning, easing slightly.

Chance of cloud-free hill tops above 800m: 60% overnight due to occasional hill fog. Lowering 20% or less through the morning, and improving 70% through the afternoon.

Low Cloud and visibility: Mainly excellent visibility overnight but very poor in occasional hill fog, with cloud bases 400-600 m. Poor visibility in the morning in rain and hill snow, and widespread hill fog, with cloud bases 250-500 m. Improving good through the afternoon, temporarily lowering in showers and hill fog, with cloud bases 400-600 m.

Temperature: **Glens:** Plus 3 Celsius rising plus 7 Celsius by midday, falling plus 4 Celsius through the evening.
At 800m: Minus 2 Celsius rising to plus 1 Celsius by midday, falling minus 2 Celsius by evening.
Freezing level: 600 m rising 1000 m by late morning, falling 400-600 m by evening.
